

Remove the dusts and grime of clothes, gloves, and floor.

Adhesive roller series

Check Point

Removal rate is 90% or more!

The thick and soft gel fit uneven surface of hands and clothes, and remove dusts firmly.

Low running cost!

The adhesive force will return by cleaning with water. And it is possible to use for 1-2 years at once purchase.

Mixed antiviral agents!

The rollers contain a mixed antibacterial, antifungal, and antiviral agents. So it can be used more safety.

Test of removal rate

Peeling type of roller does not remove about 40% of dusts and grime, so dusts may move with the hands or clothes.

While Hand Roller / Body Roller can remove 90% or more.

ATP(+AMP) Wipe inspection

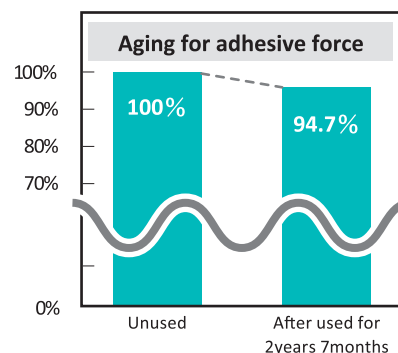

Hand / Body Roller	Peeling type of roller
90% or more	About 60%

*Lumitester is made by Kikkoman.

*This result is confirmation test in-house. There is also the case that the same result can not be obtained.

Test of adhesive force

EXSEAL's adhesive roller can be used repeatedly by washing, and the adhesive force does not weak even if you use it for a long time.

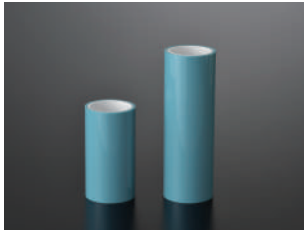

- Please replace it in about 3 years.

Depending on the operating environment and frequency of use.

*We have tested with the rollers that our customers used actually.
